INDEX TO VOLUME III

Allen, H. S. Idempotent Operators on a Vector Space . . 94

Ap Simon, H. A Method of finding the Critical Lattices of Spheres containing the Origin 91

Bailey, W. N. A Note on Two of Ramanujan's Formulae . . 29

—— A further Note on Two of Ramanujan's Formulae . . 158

Besicovitch, A. S. Variants of a Classical Isoperimetric Problem 42

Boas, Jr., R. P. Integrability of Trigonometric Series (III) . 217

Burchnall, J. L. Some Determinants with Hypergeometric Elements 151

Chalk, J. H. H. The Minimum of a Non-homogeneous Bilinear Form 119

Cole, A. J. On the Product of n Linear Forms 56

Davenport, H. Linear Forms associated with an Algebraic Number-field 32

—— Note on a Result of Chalk 130

Dirac, G. A. Connectivity Theorems for Graphs . . . 171

Eggleston, H. G. Measure of Asymmetry of Convex Curves of Constant Width and Restricted Radii of Curvature . . 63

—— A Proof of Blaschke's Theorem on the Reuleaux Triangle . 296

Fawaz, A. Y. On an Unsolved Problem in the Analytic Theory of Numbers 282

Fröhlich, A. On the Class Group of Relatively Abelian Fields . 98

Gilbert, C. Statistical Systems of Particles in the Expanding Universe 161

Hayes, N. D. The Roots of the Equation $x = (c \exp)^n x$ and the Cycles of the Substitution $(x \mid ce^x)$ 81

Ibrahim, E. M. The Plethysm of S-Functions. 50

Jones, D. S. A simplifying Technique in the Solution of a Class of Diffraction Problems 189

Kanagasabapathy, P. On the Product of two Linear Forms, one Homogeneous and one Non-homogeneous 197

Kosambi, D. D. Path-spaces admitting Collineations . . 1

—— Path Geometry and Continuous Groups 307

Lambe, C. G. Lamé-Wangerin Functions 107

Macbeath, A. M. Non-homogeneous Lattices in the Plane . 268

510.52
Q242

Miller, K. S. Self-adjoint Differential Systems 175

Morgan, A. J. A. The Reduction by One of the Number of Independent Variables in some Systems of Partial Differential Equations 250

Patterson, E. M., and **Walker, A. G.** Riemann Extensions . 19

Perfect, H. Note on a previous Paper on Matrices with Positive Elements 187

Pidduck, F. B. Some Integral Representations of an Analytic Function 222

Putnam, C. R. Function Space : Hilbert-space Correspondences in Quantum Mechanics 260

Rado, R. A Theorem on Sequences of Convex Sets 183

Reifenberg, E. R. Parametric Surfaces (III) : The Problem of Geocze 227

Routledge, N. A. A Result in Hilbert Space 12

Sandham, H. F. Two Identities due to Ramanujan 179

Schneider, H. Theorems on Normal Matrices. 241

Slater, L. J. General Transformations of Bilateral Series . . 73

—— Integrals representing General Hypergeometric Transformations 206

Smith, R. C. T. An Interpolatory Function analogous to the Cardinal Function 235

Stone, A. H. On Infinitely Multicoherent Spaces 298

Titchmarsh, E. C. On the Convergence of Eigenfunction Expansions 139

Walker, A. G., see **Patterson, E. M.**

Weston, J. D. On the Bounds of a Bilinear Form related to Hilbert's 115

Wilson, R. A Note on a Theorem of Pólya's 145
